## Roadmap2025

Roadmap2025 looks into how will Sonderborg reach 75% CO2 emission reduction by 2025 and pave the way to a carbon neutral city in 2029. The roadmap has been developed by ProjectZero and approved and ratified by the City Council end of 2018.

# Roadmap2025

50 steps towards a carbon neutral Sonderborg

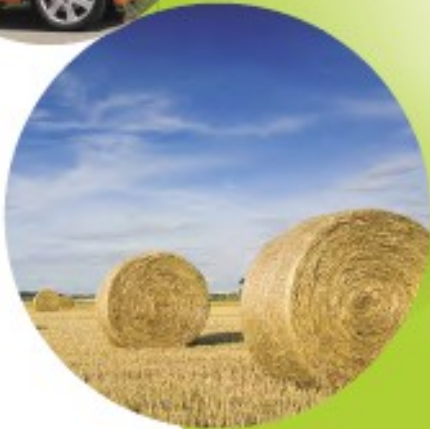

**Roadmap 2020**

In 2014 ProjectZero launched its 2020 Roadmap for a 50% carbon reduction by 2020. The roadmap is based on 6 specific area initiatives: citizens, businesses, public sector, energy from renewables, Bio Economy and green Transportation.

Sonderborg - a Bright Green Danish Municipality  
Roadmap for creating green growth and a ZEROcarbon Sonderborg

Bright Green Business  
**ProjectZero**

A large graphic at the bottom of the page features a green silhouette of a person's head and shoulders. Inside the silhouette are several circular images: a wind turbine, a person making an 'OK' hand gesture, and solar panels being installed on a roof. To the right of the silhouette is a cluster of wind turbines. At the bottom center, there is a logo for "Nordborg" with a green circular icon and a dotted line.

**Roadmap 2015**

Efficiency and effectiveness are driving the short term initiatives:

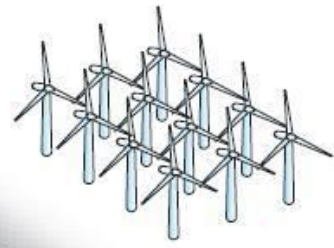

**Efficiency:** Smart use of energy in new house construction, energy retrofits of existing houses/buildings and energy efficiency improvements in companies production processes. Several programs has been implemented to support energy efficiency improvements.

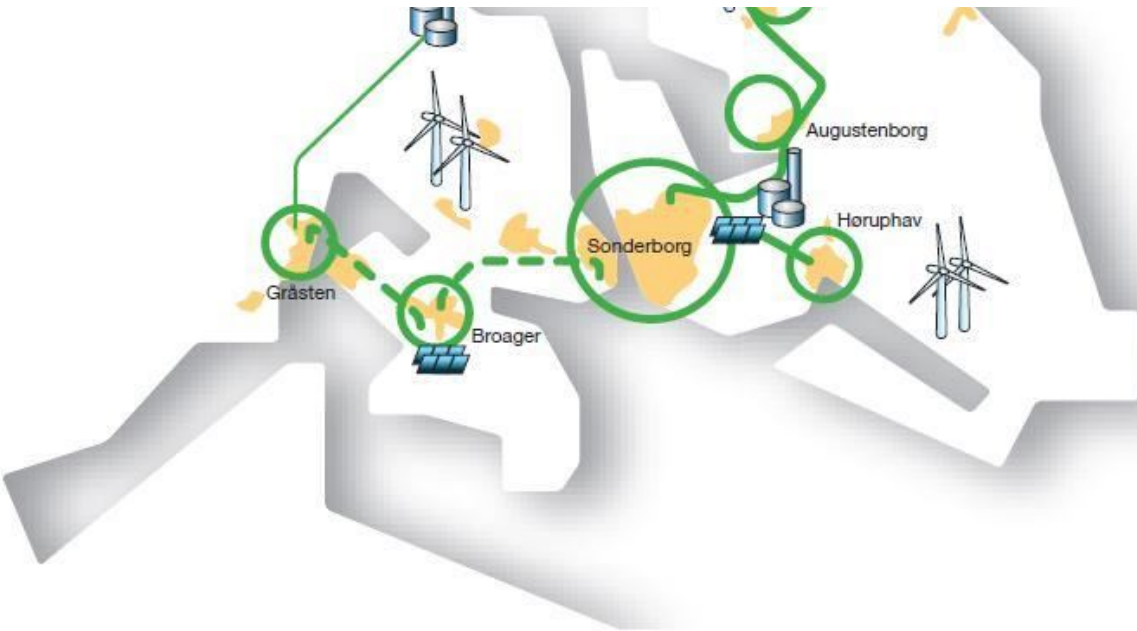

**Conversion to renewables:** Massive use of district heating based on new green sources and replacement of old oil burners by heat pumps will alone reduce the carbon emissions by 12.5 % toward 2015.
